

ANGELS AND DEMONS (answer)

by Kenny and Dana Young

Begin by doing just what the puzzle directs you to do; drag the dots around until none of the lines intersect and they all become angels. This is just like the game Planarity (see www.planarity.net), but with larger dots.

When the entire web is untangled, another set of smaller red dots appears:

The dots tell you how to travel from angel to angel; by analyzing the patterns in the web, the phrase NAME OF DEMON'S BAR IN ANGEL appears. A quick web search brings up **CARITAS**, the name of the bar in the TV show *Angel* owned by a demon named Lorne.
