

EIGHT BITS MAKE A DOLLAR (answer)

by Meredith McClurg

The first thing to notice is that the conversation is between Rae, Greta, and Beth (RGB). There are hidden colors throughout the text. There are 14 colors which are missing either the first or last letter. Each of those colors is associated with an RGB hex value which can be found on Wikipedia. Each color can also be associated with one of the speakers. Take the corresponding color value (if the color is Hot Pink (255, 105, 180) and it is spoken by Greta, 105). These are 0 based indices into the original text which has 256 words. This provides the phrase – “I just freeze every time you see through me and it’s all over you” which is a lyric to the song and answer **“ELECTRIC BLUE”**
