

This document may be used to print out pieces for the PH123 meta. This works best when printed out on 17" x 11" card stock.

Print pages 2-4, then flip the pages around the vertical axis, and print pages 5-7. Cut along the black lines on the back (non-Jeopardy) sides of the printouts. Don't forget to cut the slits near each vertex.

The slits on the nonagons are not visible due to the grid, but it should be obvious where to make them. Note that there are two ways of doing this—clockwise and counter-clockwise; be sure to cut in a clockwise direction, matching the way the pentagons and rectangles are cut.
